PROFESSIONAL SUMMARY

Computer Science & Engineering student at SVERI's College of Engineering, Pandharpur, building a dual foundation in Data Analytics and Cyber Security through structured coursework, a hands-on Cyber Security internship, and data-driven academic projects. Completed a Cyber Security internship at Future Interns focused on structured, task-based security assignments, technical analysis, and systematic problem-solving. Strengthened analytics capability through the HP LIFE "Data Science & Analytics" program and by applying Python-based data collection and analysis in IoT and computer-vision projects (real-time sensor data, water-quality and growth-pattern tracking). Also engaged in technical research (published IJSREM review paper on Deep Learning in Medical Diagnosis) alongside strong co-curricular involvement — coordinated national-level departmental events and presented an agri-tech innovation idea at DIPEX-2026. Combines technical proficiency in cloud platforms (AWS, GCP), programming, and embedded systems with proven leadership and organizational skills gained through event coordination and team collaboration.

KEY EXPERTISE

Data Analytics, Cyber Security, IoT & Computer Vision, AI Tools, AWS, Google Cloud, Python, Event Coordination, Team Leadership

EDUCATION

SVERI's College of Engineering Pandharpur	2023 - 2027
B.Tech. - Computer Science & Engineering Percentage: 63.65 / 100	
Ramkrishna Paramhansa Mahavidyalaya, Dharashiv., Dharshiv	2023
12 th MSBSHSE Percentage: 51.33 / 100	
Samata Madhyamik Vidyalaya, Dharashiv, Dharshiv	2021
10 th MSBSHSE Percentage: 65.60 / 100	

INTERNSHIPS

FUTURE INTERNS Cyber Security	08 Jan, 2026 - 08 Feb, 2026
CYBER SECURITY INTERN	
Completed a 1-month Cyber Security internship at Future Interns, working on structured, real-world security assessment tasks documented and submitted via public GitHub repositories. Key deliverables included:	
Vulnerability Assessment Report for a Live Website — Identified common web vulnerabilities using Nmap and OWASP ZAP (passive scanning), classified risks (Low/Medium/High), and prepared a client-facing report with clear remediation steps.	
Phishing Email Detection & Awareness System — Analyzed phishing indicators (spoofed senders, fake domains, malicious links) using email header analysis, classified sample emails as Safe/Suspicious/Phishing, and authored a security-awareness report with prevention guidelines.	
API Security Risk Analysis — Used Postman and browser DevTools to identify insecure API endpoints, assess authentication/authorization issues (tokens, access control), and flag missing rate-limiting and input-validation gaps, culminating in a risk analysis report with remediation suggestions.	
Received a Letter of Recommendation for consistent professionalism, methodical problem-solving, and ability to translate technical security findings into clear, business-friendly documentation. Strengthened practical skills in vulnerability assessment, risk classification, and security reporting.	

PROJECTS

Development of an Automated Fertilizer Spraying Vehicle for Crop Management	01 Dec, 2025 - 20 Feb, 2026
Team Size: 4	
Key Skills: Microcontroller Programming, Embedded Systems, Sensors, Automation, Precision Agriculture, Arduino	
Designed and developed an automated fertilizer spraying vehicle aimed at precision agriculture applications (IDP Project). Integrated microcontroller-based control systems along with sensors and a Bluetooth module to enable automated, wireless-controlled fertilizer spraying across crop fields. My role involved system design, sensor-control integration, and implementing Bluetooth-based communication for remote operation and real-time monitoring of the spraying mechanism based on field conditions. The project aimed to reduce manual labor in fertilizer application and improve overall fertilizer-use efficiency in crop management, contributing toward more sustainable and cost-effective farming practices.	
Smart Fish Growth Monitoring System Using IoT and Computer Vision	15 Nov, 2025 - 03 Feb, 2026

Team Size: 6

Key Skills: IoT, Computer Vision, Python, Arduino/ESP32, Sensors, Image Processing, Embedded Systems

Developed an IoT-based aquaculture monitoring system to track fish growth in real time. Applied computer vision techniques to automatically estimate fish size and monitor growth patterns over time. Integrated multiple sensors (e.g., water quality, temperature) for continuous real-time data collection and monitoring. My role involved designing the sensor integration and implementing the computer vision-based size estimation module. The project (developed under DIPEX) resulted in a functional prototype capable of automated, non-invasive fish growth tracking, reducing manual monitoring effort for aquaculture management.

IoT-Based Smart Agriculture: Soil Moisture Monitoring System

06 Feb, 2025 - 15 Mar, 2025

Team Size: 2

Key Skills: IoT, Arduino, ESP32, Soil Moisture Sensors, Automation, Embedded Systems

Built an IoT-based smart irrigation system to automate water management in agricultural fields using soil moisture sensors integrated with Arduino/ESP32 microcontrollers. Automated the water pump control mechanism to activate or deactivate irrigation based on real-time soil moisture threshold readings. My role involved sensor integration, threshold calibration, and control logic implementation. The system helped optimize water usage, reduce manual irrigation monitoring, and support more efficient and sustainable farming practices.

Java Console Chatbot

Key Skills: Core Java, OOP, Console Application Development, Rule-Based Logic

Developed a rule-based console chatbot using Core Java, capable of responding to basic user queries (e.g., "hi", "hello") through simple keyword matching. All questions and their corresponding answers were stored directly within the code as predefined rules — no external APIs or databases were used. Implemented a modular response-handling architecture, allowing new rules and responses to be added easily without restructuring the core logic. My role covered the complete design and development of the chatbot logic and response modules. The project strengthened my understanding of Java fundamentals, object-oriented design, and building extensible console-based applications using in-memory, hardcoded data structures.

PUBLICATIONS / RESEARCH / WHITE PAPERS

Deep Learning for Medical Image Diagnosis: A Review of Methods, Applications, and Challenges

19 Nov, 2025

International Journal of Scientific Research in Engineering and Management | **No. of Authors:** 3

Deep Learning for Medical Image Diagnosis: A Review of Methods, Applications, and Challenges

International Journal of Scientific Research in Engineering and Management (IJSREM) | Nov 2025 | ISSN: 2582-3930 | SJIF Rating: 8.586

Published as First Author Omkar Dhekane, along with co-authors Prasad Khapale and Samarth Kshirsagar Dept. of Computer Science & Engineering, SVERI's College of Engineering, Pandharpur, Solapur University. The paper is a peer-reviewed review article examining how deep learning techniques — CNNs, RNNs, Autoencoders, GANs, and Vision Transformers — have transformed automated medical image diagnosis, covering key architectures, clinical applications, common datasets, a generalized DL workflow, and future directions such as Explainable AI and Federated Learning.

DOI: 10.55041/IJSREM54190

ACHIEVEMENTS

- Presenter – DIPEX-2026, Idea Presentation Round (Solapur Region) Participated as presenter under theme "Agricultural Technology" in DIPEX-2026 Idea Presentation Round, Solapur Region, held at Karmayogi Institute of Technology, Pandharpur, on 4 Feb 2026.
- QuizOff 2026 – India's Biggest AI Quiz (Participant) Participated in QuizOff 2026, India's Biggest AI Quiz, organized by CampusCrew and hosted on Unstop, competing among 5,25,000+ students from 48,500+ institutions across the globe (19 July 2026).

ASSESSMENTS / CERTIFICATIONS

Google Cloud Career Launchpad – Computing Foundations Track

Provider: Google Cloud

Key Skills: Cloud Computing, Google Cloud Platform, IT Fundamentals

Successfully completed all courses and labs in the Google Cloud Career Launchpad Computing Foundations track, issued on 1 October 2025. The certification does not expire and validates foundational knowledge of cloud computing concepts on the Google Cloud Platform.

AWS Academy Graduate – AWS Academy Cloud Foundations

Provider: AWS Academy

Key Skills: AWS, Cloud Computing, Cloud Architecture, Cloud Services

Completed the AWS Academy Cloud Foundations program covering 20 course hours, issued on 17 September 2025. Gained foundational knowledge of AWS cloud concepts, core services, security, architecture, pricing, and support. Digital badge verified via Credly.

Cybersecurity

Provider: Tech Mahindra Foundation (via Skill India Digital Hub)

Key Skills: Cybersecurity, Information Security Fundamentals

Successfully participated in and completed a 10-hour online skilling course on "Cybersecurity" offered by Tech Mahindra Foundation through the Skill India Digital Hub. Course completed on 22 September 2025.

Data Science & Analytics

Provider: HP LIFE & HP Foundation

Key Skills: Data Science, Data Analytics, Data-Driven Decision Making

Successfully completed the HP LIFE online course "Data Science & Analytics," presented on 1 December 2026. Learned leading data science and analytics practices, methodologies, and tools; examined the benefits and challenges of a data-driven approach for businesses; and gained essential skills for pursuing a career in the field.

SEMINARS / TRAININGS / WORKSHOPS

AI Tools and ChatGPT Workshop Institute Name: be10x 10 May, 2026 - 10 May, 2026

Key Skills: ChatGPT, AI Tools, Prompt Engineering, AI-Assisted Coding, Data Analysis

Completed a hands-on workshop on AI tools and ChatGPT conducted by be10x, focused on practical applications of generative AI for productivity. Gained skills to create presentations using AI in under 5 minutes, analyze data using AI in under 30 minutes, and code and debug using AI in under 10 minutes, enhancing overall efficiency in academic and technical tasks.

AI for Students: Build Your Own Generative AI Model 24 Nov, 2024 - 24 Nov, 2024

Institute Name: NxtWave

Key Skills: Generative AI, AI Fundamentals, Machine Learning Concepts

Participated in a workshop conducted by AI expert Mr. Abhinav Devaguptapu on "AI for Students: Build Your Own Generative AI Model," organized by NxtWave. The workshop was designed to equip students with essential skills for the AI era, covering foundational concepts of generative AI and model building.

CO-CURRICULAR ACTIVITIES

- 1. Coordinator – CHAKRAVYUH 2.0 (National Level Event) Served as Coordinator for CHAKRAVYUH 2.0, a national-level event by CSE Dept, SVERI's College of Engineering, Pandharpur (9–11 Mar 2026). Recognized for outstanding support in organizing the event.
- 2.Coordinator – Registration Committee, Spirit 2K25 Worked as Head/Coordinator of the Registration Committee for Spirit 2K25, a national-level event organized by the CSE Department under ICON, SVERI's College of Engineering, held on 22 March 2025.

PERSONAL INTERESTS / HOBBIES

- building IoT-based mini projects.
- listening to music
- gaming in leisure time
